CrowdHelpers is a profitable reward-based crowdfunding platform that enables individuals to help finance other members dreams in exchange for an estimated 40% reward on your donations monthly while helping others.

The CrowdHelper system completely belongs to the members. It's a real mutual aid platform where ordinary people help each other achieve their financial goals in life.

There are no central accounts where the community money flows to. The community members themselves transfer funds to each other directly without any intermediaries.

This crowdfunding method results in a win-win proposition for both the donors and fundraisers.

The fundraisers get the funds they require to achieve their financial goals they set for themselves. **On the other hand, the donors receive an estimated 40% reward on their donations for helping the fundraiser.**

**40% MONTHLY**

**Our members can earn some pretty good profits and monthly gains with CrowdHelpers.**

**You can get these benefits just from the comfort of your home.**

What this platform does is to connect people who need funds to finance their dreams with people who are willing to provide donations that will help them achieve their financial dreams .

## Here Is **How It Works** ?

Technically. You create a financial dream, and after your dream is activated by providing financial help to another member.

Your account will be credited with **Helpcoins** which is the internal currency of the System.

Your **Helpcoins** will start to grow at an estimated forty percent interest monthly from the moment you activate your dream by providing help to another member.

And in return, when your dream matures, you may now seek the financial help based on your available **Helpcoin** balance, and other community members will be paired with you to provide you with your requested financial help.

This system could hardly stall. This is because, more and more people worldwide will keep joining the system daily to provide help to those whose dreams have matured.

**This system could run seamlessly for years.**

The entire system is **simple, straightforward and seamless** !

For example, let's say you want a bicycle.

This is your dream and the bicycle may cost \$500.

Let's say you only have \$100 to donate toward your \$500 dream.

You may donate this amount and Crowd Helpers will calculate approximately how long it will take for you to receive \$500 being your financial dream.

At an estimated 40% monthly reward, it will take an average of four months to fulfill your \$500 Bicycle dream that you activated with just \$100.

To activate your dream, the system will pair you with other members in the community.

You will have to donate this \$100 to other members in the community.

As soon as you do that, you will receive **HELPCOINS** that will start growing at an estimated 40% reward monthly until you will receive \$500.00

**This system could run seamlessly for years.**

As you can see, with this system, there are no intermediaries, **No Central Account** where all the community money flows to. The community members themselves transfer funds to each other directly without Intermediaries.
